PROFESSIONAL SUMMARY

Lead iOS Engineer with 9+ years architecting and scaling mobile banking platforms serving 2.5M+ users. Deep expertise in Swift/SwiftUI system design, performance optimization, and technical leadership. Proven track record at Barclays, HSBC, and Co-op Bank delivering secure, high-performance features in fintech environments. Mentored senior engineers and established engineering practices that reduced production bugs by 31% and improved code coverage to 82%.

CORE COMPETENCIES

iOS Development • Swift • SwiftUI
System Architecture • MVVM Pattern
Performance Optimization • Memory
Management
Core Data • Combine Framework

CI/CD Pipeline (Fastlane, Jenkins) • Build Automation
Technical Leadership • Code Review Culture
Mentorship & Team Development •
Security/OAuth 2.0
PSD2 Compliance • Mobile Banking

PROFESSIONAL EXPERIENCE

Capgemini | Lead iOS Engineer

August 2023 – Present (2 years 10 months) | India

Cards & Payments Domain | Barclays Digital Platform

- Architected and shipped 3 critical payment flows serving 2.5M+ active users; ensured PSD2 compliance and OAuth 2.0 security. Reduced payment transaction failures by 22% through retry logic optimization.
- Redesigned CI/CD pipeline using Fastlane & Jenkins: cut build times from 18 to 11 minutes (40% reduction), enabling 15+ deployments/week vs. 3-4 previously. Automated App Store deployment reduced human error by 95%.
- Led mentorship program: coached 4 junior-to-senior engineers on architecture patterns and system design. 3 engineers promoted within 18 months.
- Owned performance optimization initiatives: reduced app startup time by 2.8s (35% improvement) through Swift profiling and lazy-loading. App Store rating improved from 4.1 → 4.5 stars.
- Established code review culture: introduced architectural review checkpoints. Reduced production bugs by 31% and increased test coverage to 82%.

Capgemini | Software Consultant

February 2022 – August 2023 (1 year 7 months) | India

- Built foundational iOS architecture for HSBC's retail banking platform (SwiftUI, MVVM); established patterns adopted by 2 concurrent teams (12+ engineers). System handled 500K+ daily transactions.
- Implemented real-time transaction notifications using WebSockets and Combine framework; 99.8% message delivery rate, sub-200ms latency.
- Conducted security audits on OAuth 2.0 and encryption implementations; identified and remediated 8 critical vulnerabilities before production.

Rishabh Software | Sr iOS Engineer

June 2021 – January 2022 (8 months) | Vadodara, India

- Rebuilt legacy Objective-C codebase to modern Swift/SwiftUI (40K LOC refactor); reduced app crash rate from 2.1% to 0.3%, improved startup time by 45%.
- Mentored 2 junior engineers on Swift best practices and dependency injection; both progressed to mid-level roles.

Stocktake Online | iOS Engineer

January 2019 – April 2021 (2 years 4 months) | India

- Shipped inventory management app (2.0M+ downloads); architected offline-first sync using Core Data and background sync tasks.
- Optimized memory footprint by 28% through lazy collection loading and strategic caching, enabling app to run on 2GB RAM devices.
- Drove user retention: implemented push notification system (FCM integration); improved 7-day retention by 18%.

Bit01 Techplode / AGILE Infoways | JR iOS Engineer

April 2017 – December 2018 (1 year 9 months) | Ahmedabad, India

- Built foundational iOS skills at 2 early-stage fintech startups; shipped 4 consumer apps, learning full product lifecycle from architecture to App Store deployment.

EDUCATION

Ganpat University

Master's Degree in Computer Programming | 2012 – 2017

CERTIFICATIONS & CONTINUOUS LEARNING

- Certificate of Completion: Introduction to Agent Skills
- Certificate of Completion: Claude Code in Action
- Active technical writer on Medium (@viralswift) covering Swift internals, SwiftUI patterns, and production iOS engineering

ADDITIONAL INFORMATION

- Tech Writer: Published articles on Swift internals, SwiftUI design patterns, and real-world iOS architecture challenges
- Open Source Contributions: Active in iOS development community; exploring agentic workflows for developer productivity
- Languages: English (Fluent), Hindi (Fluent)
